EXPERIMENT No :- 4

THEORY

01 :- Data comparison :- Used to compare joining data using <, > etc

02 :- LENGTH () :- RETum no of characters in string

03 :- UPDATE :- Modifies existing records in a table.

04 :- Percentage calculations :- Used for salary increment (eg - 10% increa

05 :- Pattern with :- checks specific characters position in a string

1. Display the list of employees who have joined the company before 30th June 80 or after 31st Dec 81.

maria DB [Ashishsingh[illegible]] > SELECT employee WHERE hiredate < 1980-06-30 OR hiredate > 1981-12-30;

2. Display the names of employees whose names have second alphabet A in these names.

Maria DB ['Ashishsingh[illegible]] > SELECT ename FROM employee where ename Like "_A%";

3. Display the names of employees whose name is exactly five character in length.

Maria DB [Ashishsingh[illegible]] > SELECT ename from employe where ename like '_____';

4. Display the names of employees whose names have second alphabet A in their name

Maria DB ['Ashishsingh[illegible]] > SELECT ename from employee where ename Like '_A%';

```
MariaDB [vijendra0862]>
MariaDB [vijendra0862]> SELECT ename
    -> FROM employee
    -> WHERE job NOT IN ('SALESMAN', 'CLERK', 'ANALYST');

. Update the salary of each employee by 10% Increment who are not elegible for commission

MariDB [Ashishsingh...]> UPDATE employee SET sal = sal * 1.10
WHERE comm IS NULL;

Display those employees whose salary is more than 300 after giving 20% increament

MariDB [Ashishsingh...]> Select ename sal from
employee WHERE sal * 1.20 > 3000

Display those employees whose salary contains all least 3 digits.

Maria DB [Ashishsingh...]> SELECT ename sal from
employee where sal >= 100;
